When Enormis Mobile Specialties is talking to clients about a remote starter, the subject of a bypass module, or transponder module, often comes up. As we are getting to know the client better, they will often ask the question: **How to Bypass the Starter Solenoid | It Still Runs**

The clicking sound is the starter solenoid trying to force the starter gear to engage the engine. However, the solenoid could be too weak to force the gear to engage or the bearings inside the starter motor could be frozen. To determine which component is defective, you can bypass the starter solenoid.
