Smoke alarmS are a key part of a home fire escape plan. When there is a fire, smoke spreads fast. Working smoke alarms give you early warning so you can get outside quickly. ! A closed door may slow the spread of smoke, heat, and fire. Smoke alarms should be installed inside every sleeping room, outside each separate sleeping area, and on every level. Smoke alarms should be connected so [Where to Place Smoke Detectors in Your Home - The Spruce](#)

Although they are often lumped together as "smoke alarms," there are actually three different types of smoke and fire alarms used in homes. Some actually detect heat and actual fire, some detect smoke, and some do both jobs. [Optical beam smoke detector - Wikipedia](#)

An optical beam smoke detector is a device that uses a projected beam of light to detect smoke across large areas, typically as an indicator of fire. They are used to detect fires in buildings where standard point smoke detectors would either be uneconomical or restricted for use by the height of the building.

Smoke detector - Wikipedia

A smoke detector is a device that senses smoke, typically as an indicator of fire. Commercial security devices issue a signal to a fire alarm control panel as part of a fire alarm system , while household smoke detectors, also known as smoke alarms , generally issue a local audible or visual alarm from the detector itself.
